### virtual lab population biology key - PDF Free Download

The number of individuals in a population, or population size, is perhaps the most important thing to know about a population. This model is an in-depth exploration of the mark-recapture method of estimating population size by simulation of a meadow vole population. The individuals can be trapped, marked, released, and re-trapped.

**Population Ecology - Virtual Biology Lab**

1. Virtual Labs will provide to the students the result of an experiment by one of the following methods (or possibly a combination) Modeling the physical phenomenon by a set of equations and carrying out simulations to yield the result of the particular experiment.

**Virtual Labs**

Unit 3 Oceans. Oceans cover three-quarters of the Earth's surface, but many parts of the deep oceans have yet to be explored. Learn about the large-scale ocean circulation patterns that help to regulate temperatures and weather patterns on land, and the microscopic marine organisms that form the base of marine food webs.
