The Hilux started production in March 1968 as the RN10 in short-wheelbase form with a 1.5 L inline-four engine, generating a maximum power output of 77 PS (57 kW; 76 hp) in Japanese market specification. In Japan, it was available at the Toyota Japan dealership retail chains called Toyota Store and Toyopet Store. The modification to the engine was enough for a claimed top speed of 130 km/h (81 ...

Toyota Hilux - Wikipedia

Hey Man, A 2010 Hilux wont give you any problems. The main cars suffering from injector failure are the 05-07 Hilux/Prado's. The main reason for the premature failure is dirty fuel which blocks injectors and causes the tips of them to be melted some what which causes them to not work properly when cold. this gives the car the 'death rattle' which can be bad in the long run if left unattended to.
