Last Sunday my son had to prepare for a Math test in primary school. We spent the week asking him the Ein-mal-Eins (the multiplication tables) and that morning, while I took some time off any screen and was reading a book, I noticed that my wife spent lots of time to write on a couple of sheets of paper tens of math questions. Since my son was playing out with Scratch (he got a Scratch ...

I got bored with asking my son for multiplication tables ...

Since there are two neurons, we can do a matrice multiplication by creating matrices for the parameters: the weight matrix should have two columns. (Since here the input data has one column, then the weight matrix should have one row and two columns). We can do a random initialization, and choose some values.
